## Get cycling

Against a backdrop of blue sky and sunshine, today's ride to work on this crisp, clear autumn morning reminded me of what a simple pleasure cycling can be. Whilst the experience is often enhanced with some specialist gear, all you really need to get started is a bike. For a relatively small outlay the benefits are many. As well as improved health and offering a cost-effective alternative to high fuel and ticket prices, riding a bike allows you to accurately manage your journey time. It's fast, efficient and provides freedom that other modes of transport just can't offer.

At Ridgeback we continue to look at everything cycling to make sure each new range meets the varied needs of today's cyclists.

New for this season, Dual Track is a versatile all-rounder and highly capable urban commuter. It's easy to ride and handles well under load whether you're carrying luggage or using a childseat.

For those wanting speed, comfort and great braking, there's Flight, the series that led the way for disc equipped commuting bikes. If you're a fan of hub gears, the World series Journey is Ridgeback's first Shimano Alfine touring bike. Another new arrival is the Cerium, a practical disc braked road bike for commuting and light touring.

There's much more besides, so whatever your particular style of riding, we're sure you'll find a Ridgeback that's right for you, in this years brochure and online at [ridgeback.co.uk](http://ridgeback.co.uk)

RIDGEBACK

1983

## The first Ridgeback bike

Nearly 30 years ago in 1983, Ridgeback launched the UK's first mountain bike. 1990 saw the arrival of the Ridgeback Roxy, an early forerunner of today's Rapide series - the benchmark by which all other commuter bikes are measured.

Ridgeback's Urban series became another trend setter. In 1998 these slick tyred, street mountain bikes were not only lots of fun to ride but provided a serious alternative to the more traditional commuting bike.

In 2001 we created the flat bar road bike. Originally named Genesis, this new breed of fast commuter sports bike is seen as one of the last significant developments in cycle genres.

## 25th Anniversary Ridgeback R25

Ridgeback's award winning design continues in the latest Flight and Ultraflight Series and in 2008, to mark our 25th anniversary, the R25 was launched. This was a limited edition of one hundred very special flat bar road bikes. Based on a prototype bike I was riding at the time, the R25 was Ridgeback's most advanced flat bar bike to date.

Four years on and it's now clear that the R25 was a precursor of the future of braking on performance flat bar bikes, as it was equipped with Shimano Deore XT hydraulic discs, capable of awesome stopping power. Today, all the Flight series bikes is equipped with disc brakes.

Other milestones include, Dual Track, a robust all rounder with 29" wheels aimed at riders looking for a more comfortable off road experience. Originally designed as a mountain bike, today's Dual track is more off-road hybrid than mtb. Using 700c road rims instead of traditional 26 inch wheels, the Dual Track's larger tyres give the bike a longer contact patch for improved traction whilst rolling over lumps and bumps more smoothly.

Bringing the story up to date, 2012 sees the launch of the Cerium, Ridgeback's first drop handlebar bike equipped with disc brakes. A highly practical road bike for all types of riding from commuting to training.

**Toby Howes**  
Head of Product Design

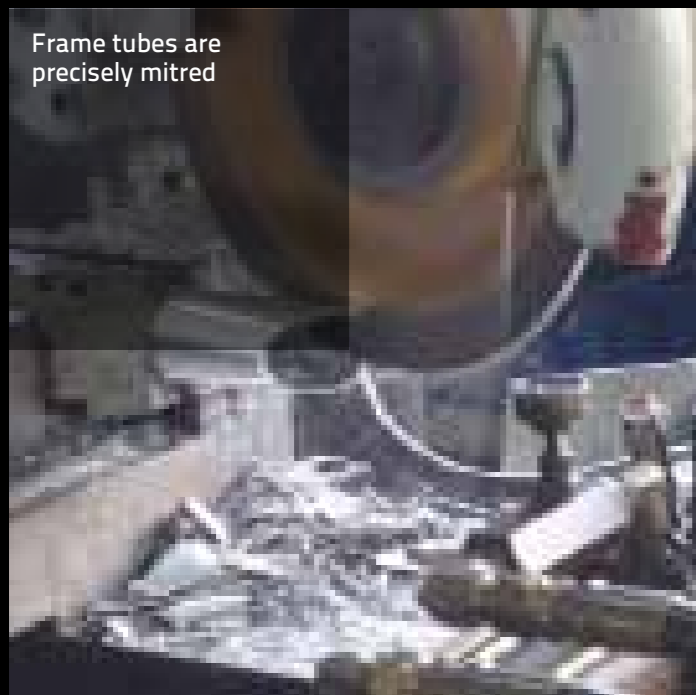

Thanks to lighter weight aluminium and steel alloys the traditional bike frame has attained new levels resilience and responsiveness. We can chose from other manufacturer's components for the best set-up, but the frame has the greatest influence on ride feel. Luckily it's the component that can be most adapted to perform the way we need it to.

# Frame Tech

All Ridgeback frames are designed to provide the best blend of performance, handling and ride quality. Meticulously constructed from lightweight aluminium or Reynolds steel, tube diameter and wall thickness are specified according to frame size and intended use.

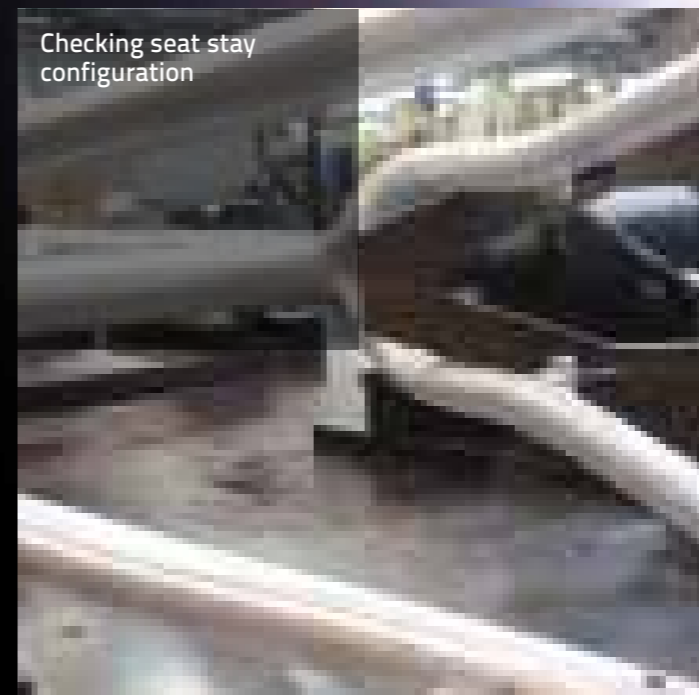

Whilst similar parts specifications are common to many bike brands, Ridgeback frame geometries are designed to work with the forks, stems and tyres, and relevant riding style to ensure that everything is in balance and working together to maximum advantage. Constructed to the highest standard, Ridgeback frames are built to last, so they're guaranteed for life.

Frame tubes are precisely mitred

Initial set up against frame drawings

Checking seat stay configuration

Inspecting frame alignment

Responsive, practical and comfortable, a Ridgeback Flight is equipped with powerful disc brakes and is ideal for fast commuting.

flight

# The fastest way to work

I bought a Flight 03 two weeks ago and have not looked back since. Brilliant commuter bike for my 18 mile daily round trip. Fast, light, tough and great looking - highly recommended!

**Matthew S**

Quick and adaptable, a Ridgeback Flight performs at the highest level on city streets, in rugged urban conditions and even on light off road trails.

Avid BB5 disc brakes

Heat-treated aluminium frame

Shimano Alfine chainset

Continental puncture resistant tyres

Designed for fast commuting, Flight bikes use robust 28c width Continental Contact puncture resistant tyres however frames are built with enough clearance to take wider tyres if required, up to 37c.

Perfect for regular city riding, disc brakes provide incredible stopping power in all conditions, especially in the wet, needing little adjustment as pad wear is low.

A short cage Shimano derailer and compact chainset compliment the bike's sleek look while providing a wide enough gear range for all but the most extreme hills.

The inclusion of mudguard and rack fittings across the range confirms the commuter practicality of these exciting bikes.

The original flat bar road bike.

ultraflight

# Quick and nimble

Back in 2001 Ridgeback created an entirely new genre of fast commuter sports bike – the flat bar road bike. Quite simply, it's a road racing bike equipped with a straight, mountain bike handlebar.

Since then the category has undergone considerable evolution and is now available in two distinctly different styles. The Flight series is a highly versatile, disc brake equipped, more rugged version of the concept whilst Ultraflight embodies the fundamentals of the original design.

Agile commuter or comfortable training bike, with a close clearance frame, tough wheelset and responsive road tyres, Ultraflight blends nimble handling and fast acceleration for an exceptionally smooth ride.

I really LOVE my Ridgeback Ultra Flight 02. I wanted a bare essentials type of bike and this is it. I've enjoyed riding it almost daily for a year and I've done more than 4,000 miles. So light! So fast! I'm now looking at a Flight model as I fancy disc brakes on my next bike.

**Gareth M**

- Responsive aluminium frame
- Shimano compact chainset
- Aluminium fork

Highly versatile drop bar bikes for transport to training and everything in between.

# Road works

I've owned a Ridgeback road bike since 2007 and continue to be very pleased with its reliability. On a recent 300km Audax ride it performed faultlessly, leaving me to soak up the miles in great comfort.

**Ulison A**

Influenced by classic steel frame geometries of yesteryear, a Ridgeback road bike uses a layout that's been ridden and enjoyed for over fifty years.

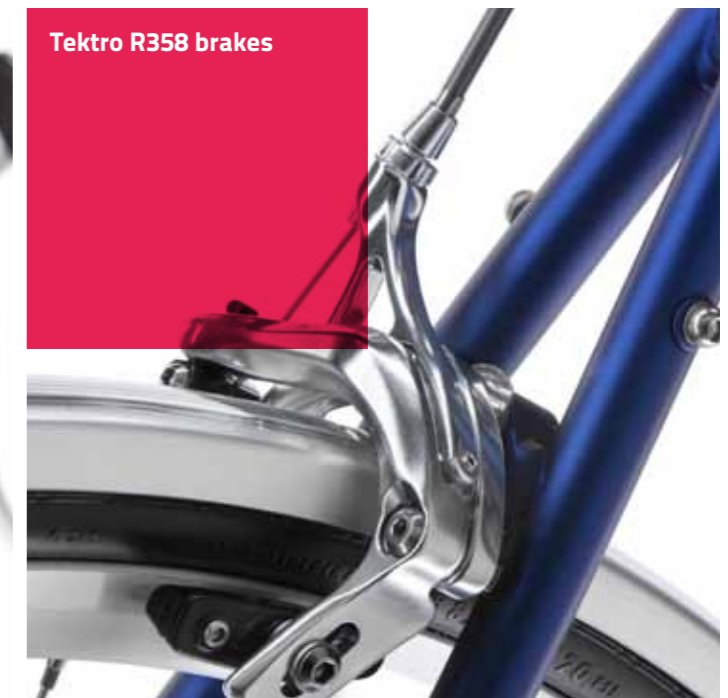

Avid BB5 disc brakes

Reynolds 520 Chrome-Moly

Shimano STI controls

Tektro R358 brakes

Today, a choice of exotic materials offer a new level of performance however, despite many technical advances, it's hard to beat the proven angles of a classic drop bar bike. Too steep at the front and fast descents can be nerve-wracking. Get the seat angle wrong and rider position can easily be thrown out of balance.

A dropped handlebar shouldn't necessarily suggest 'racing bike'. Drop bars are a versatile alternative to straight bars, providing a variety of positions which can enhance longer distance comfort.

Constructed to a geometry designed for comfortable power output and confident handling a Ridgeback road bike has deep drop brakes or discs, and is built with generous clearance for 28c tyres. Seat stay rack mounts make load carrying easy and German made SKS mudguards feature Secu-clip safety stays.

An aluminium or Reynolds steel frame and carbon fork combine to create a beautifully balanced bike for a rewarding ride whatever the distance. A Shimano compact transmission, robust wheelset and Continental tyres complete the package.

With a low centre of gravity and a classic drop bar riding position, a World series bike is as comfortable as it is stable.

# Explore distant places

I purchased my Voyage in March 2010 and I've now covered 1100 miles. The bike is very comfy and I've had no problems with it at all. Great touring bike.  
**Robert H**

World

Long distance tourer, rugged commuter or just for day rides, a Ridgeback World series bike offers a cycling experience steeped in history but with the benefit of contemporary technology.

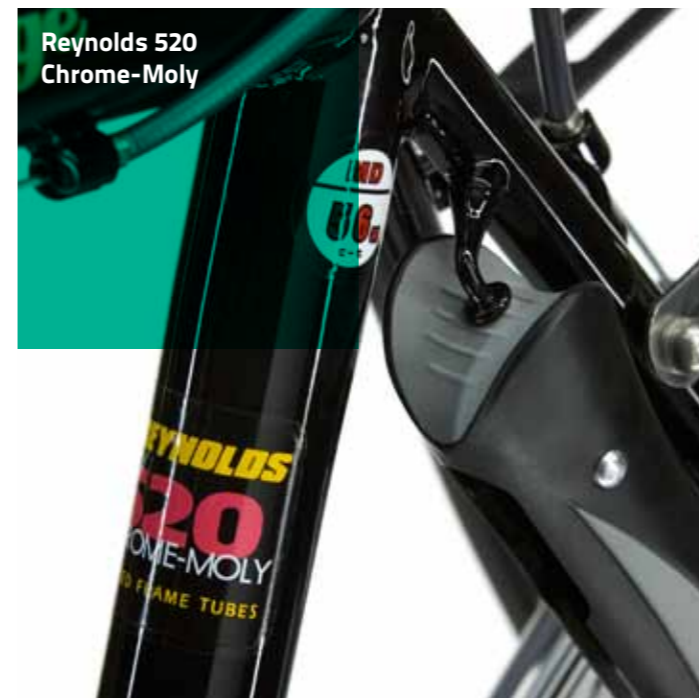

Shimano cantilever brakes

Shimano cassette hub

Reynolds 520 Chrome-Moly

Shimano cable adjuster

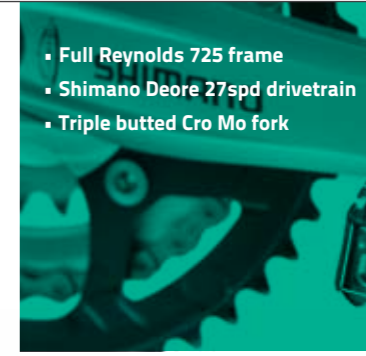

Built to exacting specifications, frames are constructed to a size specific geometry in sizes 47-60cm to ensure stability and sure handling, even when fully loaded. Hand welded using Reynolds steel tubing; a World series Ridgeback provides a responsive, comfortable ride with the structural reliability essential for a traditional expedition bike.

Designed for long periods in the saddle in remote locations, World series bikes are sensibly specified. A square taper bottom bracket allows replacement with a simple readily available cup and axle unit, whilst brazed down tube cable stops mean traditional gear levers can be used if required. Blackburn racks and bottle cages are fitted because of their proven touring heritage and a Blackburn frame fit pump completes the package.

Panorama

Offering versatility and style, Dual Track is a tough trail bike that doubles as a highly capable urban commuter.

Dual  
Track

# Tarmac and trail

I continue to use my Dual Track Advance for commuting and occasional off-road riding. It feels light and responsive, has wide gear ratios and very good brakes! This is my third Ridgeback and as usual I've no complaints.

**Heidi H**

Dual  
Track

A robust all-rounder that's self-assured on rough terrain yet feels comfortably balanced on city streets and canal towpaths.

Heat-treated  
aluminiumClearance to  
fit up to 42c  
width tyres

Chrome-Moly fork

Intellaset headset

Sometimes referred to as a 29'er, Dual Track has its roots in mountain biking but in reality the design is more off-road hybrid than mtb. Using 700c road rims instead of traditional 26 inch wheels, the Dual Track's larger tyres give the bike a longer contact patch for improved traction whilst rolling over lumps and bumps more smoothly.

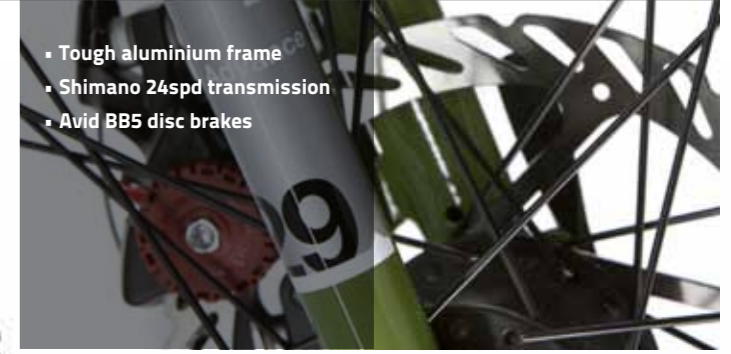

Specified with a straight bladed Cro-Moly fork, both models use a 48 tooth triple chainset for fast road riding whilst having the additional benefit of wide ratio mountain bike gearing to cope with nature's undulations out on the trail.

Larsen Mimo tyres, triple density lock-on grips and a Kevlar reinforced saddle complete the package. A Ridgeback Dual Track is tough urban commuter, towpath bike and non-suspension mtb and is the latest and most practical embodiment of the 29'er or large wheel trail bike concept.

Quest  
£599.99

Advance  
£499.99

- Tough aluminium frame
- Shimano 24spd transmission
- Avid BB5 disc brakes

Built for commuting, a Ridgeback Rapide offers the perfect combination of speed, comfort and practicality.

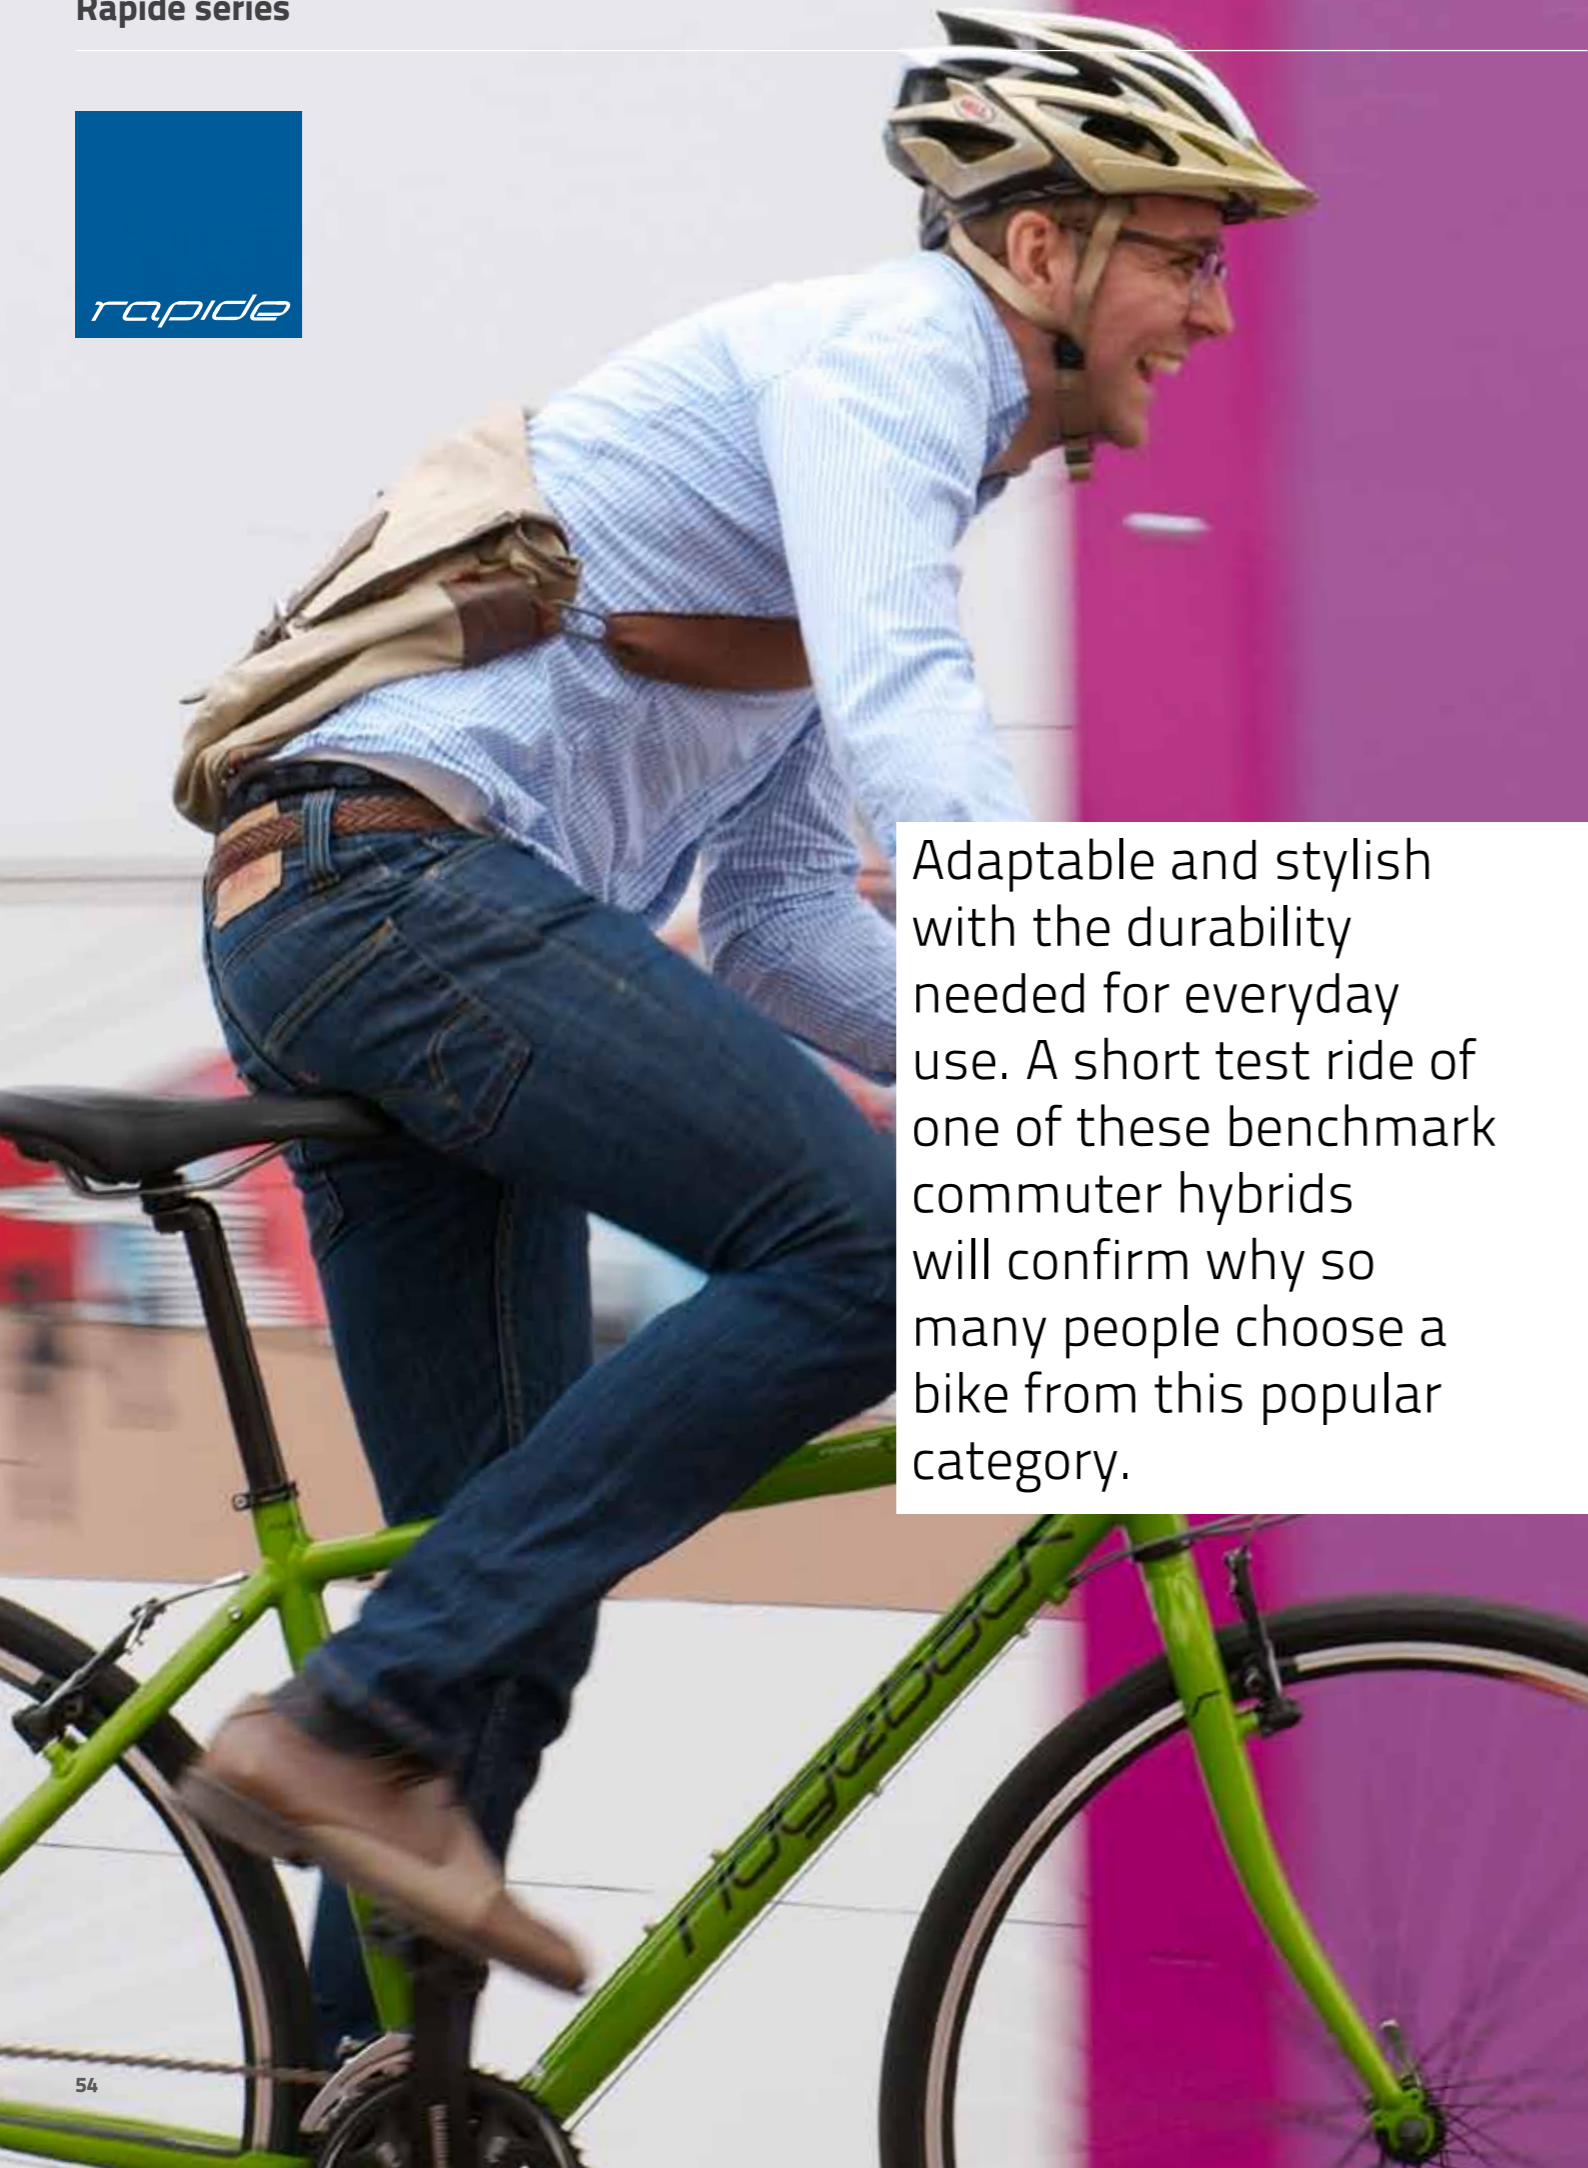

# Around town

A great all rounder for getting to work but just as good on country rides. Well built and solid. I think you get a lot of bike for your money. The gears are smooth and the saddle is comfortable and cushioned. The adjustable stem has allowed me to achieve a ride position that's great for my back and neck. Recommended.

**Steve C**

Adaptable and stylish with the durability needed for everyday use. A short test ride of one of these benchmark commuter hybrids will confirm why so many people choose a bike from this popular category.

Continental puncture resistant tyres

Lightweight 6061 aluminium frame

Comfortable ergonomic saddle

Robust Shimano cassette hub

With the strength of a mountain bike, road geometry and smooth rolling 700c wheels, the Rapide's sleek aluminium frame is built using size specific tubing for a responsive yet resilient ride.

With wide ratio gearing, ergonomic triple density grips and a comfortable saddle, a Ridgeback Rapide is commute ready as well as being a practical and fun way to get around town.

Reliability is essential when a bike is used for daily transport. A full Shimano drivetrain ensures accurate and consistent shifting over time whilst Continental puncture resistant tyres make a significant contribution to many puncture free miles. Mudguard and rack fittings are standard on all Rapide models.

# Easy cycling

Metro series bikes are lightweight and comfortable and have lots of useful features to make cycling as simple as possible. With the upright feel of a traditional town bike complimented by modern lightweight technology, comfort and low maintenance are the Metro's priority.

Built to a high quality specification, a Metro series Ridgeback offers easy shifting, great brake performance and either three, six or seven gears.

A light aluminium frame with a unisex 'low standover height' design allows easy mounting and dismounting for stability and safe handling. A comfy saddle, suspension seat post and smooth rolling, puncture resistant tyres enhance the Metro's luxurious feel.

All you have to do is enjoy the ride.

I've owned my Avenida 3 for just a few days and it has already proved to be everything I hoped it would be. A lovely looking bike, light and easy to handle and the brakes are so much better than on my old bike. I've only done about 30 miles, but we are already best mates.

**Georgina W**

A folding bike is ideal for the whole family.

# Complete travel flexibility

Bought an Attaché a couple of months back. I commute 18 miles by car then do the remaining six miles by bike. The Attaché allowed me to change from a gas guzzler to Citroen C1. I'm also going to ride my Attaché on the London to Paris folding bike challenge to raise money for the British Heart Foundation.

**Martin H**

Great for those impromptu trips, a Ridgeback folding bike offers fast reliable transport and all models come with a tough nylon carry bag.

As train companies increasingly restrict the carriage of large wheel bicycles during peak hours, the practical portability of a folding bike becomes quickly apparent. A bike in a bag is no longer a bike!

As urban commuter, quick errand run-around or just because space is limited, a Ridgeback folding bike offers a smooth stable ride and yet is amazingly compact when folded.

### Attache

£599.99

- Light aluminium frame
- Tough nylon carry bag

- Folded size 30x64x77cm

Off-road and street mountain bikes designed for durability and comfort.

# Back to nature

I have completed kitting out my MX5 for exploration, foraging, photography and commuting. It's being serviced this week and then I'm out and about on the sandy heath lands and steep paths around here. It works well all the time and continues to prove its amazing versatility.

**Philip D**

*terrain*

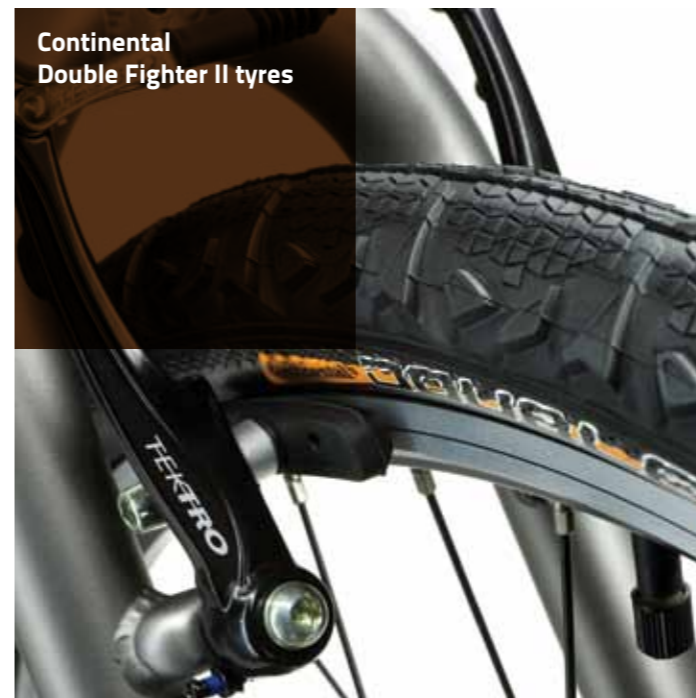

Ridgeback mountain bikes are where it all began. Available with or without front suspension, the Terrain series line up features six great bikes that ride with confidence inspiring ease.

Welded top tube gusset

Shimano M446 disc brakes

Continental Double Fighter II tyres

Shimano Acera chainset

Using a classic single-track geometry, a Ridgeback MX bike is reactive and intuitive delivering big ride feel with front suspension comfort. Built with 'go anywhere' ability, an MX is as strong as it is agile whether negotiating a twisty single track or a enjoying a leisurely ride in the park.

First and foremost a street mountain bike, a Ridgeback Switch is robustly built to handle all conditions. Designed around the tried and tested MX geometry and fitted with a rigid Cro-Mo fork, it has a lower bottom bracket and angles adjusted for urban conditions.

A 48 tooth triple chainset provides higher gears for road riding, whilst the wide ratio mountain bike cassette makes light work of the ups and downs out on the trail.

Rugged and adaptable a Ridgeback mountain bike perfectly combines multi terrain capability and off road comfort.

# Proper bikes

Tough scuff guard saddle

Adjustable reach alloy brake levers

Alloy V-brakes

Light aluminium frame

Perfectly proportioned to provide small riders the best fit for comfort and control a Ridgeback kid's bike is easily adjustable to keep pace with a growing child.

From Scoot beginner bike to 24" wheel, all bikes have a light aluminium frame and high quality specifications providing the necessary durability to allow them to be passed on to a second child.

A close up look and a quick test ride will confirm why so many people choose Ridgeback when buying a children's bike.

All Ridgeback children's bikes meet the relevant CEN safety standard. Please go online for weights, stand-over height and other information.

Durable and fun.

MX TERRAIN

# Real bikes, not toys

With a robust, light aluminium frame that allows the child to lift and handle their bike with ease, a Ridgeback boys bike is engineered to take the knocks and built to last, offering long term reliability and unbeatable value for money.

From 12" to 24", every Ridgeback boy's bike is constructed to the same exacting standards as an adult bike and undergoes professional assembly and safety checking by qualified bicycle mechanics.

The MX24 'boys' bike, which I bought for my daughter, is absolutely amazing. It's very well designed, well built and she adores it. Kids' bikes were never like this when I was a child. I have a really old mountain bike and I'm deeply jealous!

We gave our daughter a Scout for her 3rd birthday and it was the best thing we could have done to get her started on two wheels. Her confidence has increased daily and in a very short space of time she was able to use the brake.

**Heather P**

Balance is quickly learned without the distraction of pedalling.

Orange Scout pictured

The transition between walking, freewheeling and steering is simple. The Scout's rear brake establishes early understanding of how to slow down. Once balance is mastered, it's then just a small step to move onto a bike with pedals but without the need for stabilizers.

Supplied with two seat posts for widest sizing range, Scout has a very high specification level including a lightweight alloy frame, alloy rims and semi slick tyres. The saddle incorporates a neat carry handle for those tired or tantrum moments and with full bearings throughout, domed wheel nuts as well as an alloy V-brake, there is no better beginner bike.

Get more out of cycling. A Ridgeback would not be complete without products to enhance the experience. Here are some recommendations to keep you safe, maintain your bike and if you have children, allow them to enjoy it with you. For more information, please visit [madison.co.uk](http://madison.co.uk)

# Accessories

## Kryptonite Locks

Serious security is the only business Kryptonite is in. They are committed to providing innovative products to make sure that your bike remains where you left it. Kryptonite is a premier manufacturer of high-quality cables, chains, U-locks and flexible security systems for bicycles everywhere, wherever they are used, and wherever they are parked.

**KRYPTONITE**

## Giro Helmets

Giro Helmets offer an unbelievable combination of performance, value for money and style. Acu-Dial fit system provides one handed micro adjustment whilst on the move and ensures a perfect custom fit for every rider. Advanced strap management keeps everything in place to allow further fine tuning for a safe and secure fit. In-mould hardbody adds strength and protection for no extra weight penalty. Additional rear exhaust vents pull air through the helmet even when riding uphill and at slower speeds.

**GIRO**

Giro  
Helmets

## Madison Clothing

Madison clothing offers a range of the essential cycle clothing for all riders, with a wide range of sizes, shapes, and prices. The benefits come from improved comfort on the bike, and although all levels of rider will benefit from using a few specialist items of clothing, it is the occasional rider who will feel the benefit the most.

Blackburn Pumps

**Blackburn Pumps**

Blackburn pumps are part of a range that offers reliable performance whatever the product. The Air Tower 2 has a stiff barrel and welded steel base to keep it firmly on the ground to provide a wobble free platform whilst pumping. Dual head Presta and Schrader hose is totally re-buildable and ergonomic T-handle offers comfort and clever storage for patch kits, tyre levers and gym ball adaptors (included). Maximum pressure 140 psi. No-quibble Blackburn lifetime warranty.

Blackburn pump not pictured

**Electron Lights**

Electron lighting systems use the latest technologies and designs to offer great performance and durability. The Electron range covers all types of riders needs and includes some exceptional products for situations where battery life and performance are of prime concern. From Halogen front lamps to micro sized LED backup lights, take a look at the range and see what the latest lighting technology has to offer.

Electron Lights

Finish Line Lubricants

**Finish Line Lubricants**

Everything you need to keep your bike running and looking like new. Since 1988, Finish Line has been proud to offer the best selling, highest quality, bicycle-specific care products available. Take a look at how they can help make your bike easier to pedal, shift better, and last longer. Finish Line Wet Lube is a long lasting and highly water resistant lube and offers proven performance on tours, in muddy off-road conditions and on long rainy commutes.

**Park Tools**

Park Tool has been manufacturing bicycle-specific tools since 1963, and is the world's largest bicycle tool manufacturer. A long-term dedication to quality, innovation, and customer service has made Park Tool the first choice of professional and home bicycle mechanics around the world: whatever the task, you can rely on Park Tool to provide the right tool for the job.

Park Tools

CoPilot Child seats  
Bell Kids Helmets

**CoPilot Child Seats**

Child seats are a great way for you to enjoy cycling with the youngest member of the family, and are an important first step to introducing the joys of cycling to the next generation. With in-house design, research and development; rigorous endurance testing, and bone shattering shake testing, CoPilot child seats have set the industry standard for years.

**Bell Kids Helmets**

All helmets feature Bell's Fusion In-Mould construction and are lightweight and durable for enhanced performance and protection. The Ergo Dial fit system arcs inward to cup and cradle the rider's head as it tightens to ensure a perfect fit. Intuitive dial adjustment allows one-handed adjustments to be made quickly and safely even when riding along. Velcro-less pad fitting system allows simple removal for washing and can be re-fitted time and time again.

Keep updated with news, send us feedback and find your nearest dealer.

# Ridgeback connected

**Find a bike and check the spec ...**

Complete information on each bike including weight, geometry and standover height.

**Compare models ...**

Search by series or model and use the compare feature to show side by side comparison of two bikes.

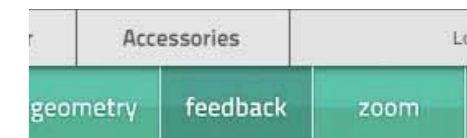

**Find a local dealer ...**

A Ridgeback dealer offers complete advice and provides first class after sales service, as well as a free 30 day tune up. Because a bike is a safety critical product, we always recommend collecting your bike in person from an authorised Ridgeback stockist.

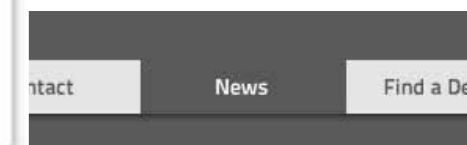

**Have your say...**

Rider response is essential. Let us know what you think of your Ridgeback and see what other owners have to say. Just click on Feedback. Or if you have a question, use Contact.

**News, advice and comment ...**

Blog format news, stories and information.

**Pedal for the planet ...**

For every Ridgeback sold, a donation is made to organisations promoting the use of bicycles. Bikes and riding preserve our environment. By making cycling our first choice transport, we can all help to ensure our planet is still a great place to ride in the years to come.

**Price and Specification ...**

Prices include VAT at current rate and are correct at time of printing. We reserve the right to revise SRP and specification without notice. Please check on-line for current SRP and specification.

**Guaranteed for life ...**

Ridgeback means quality. Constructed to the highest standard, Ridgeback frames are built to last, so they're guaranteed for life.
